EXPERIENCE

Android Developer 2024 – Present

Skynetbee Artificial Intelligence Pvt Ltd

- Built and contributed to 20+ **production-grade** Android pages using **Kotlin** and **Jetpack Compose**.
- Contributed to production **data synchronization** with reliable **offline-first** handling using **MVVM** and **Clean Architecture**.
- Architected and built two **internal development environments**, reducing project setup time by approximately **95%**.

PROJECTS

Royal Aura – Chit-management app built with Kotlin, Jetpack Compose, **MVVM**, and **Clean Architecture**.

CipherNest – Secure password manager with **AES-GCM**, Android Keystore, and biometric authentication.

Infinity 2.0 – AI application built with Python, TensorFlow, Keras, and **TensorFlow Lite**.

TrackIt – Offline-first habit tracker built with Kotlin, Jetpack Compose, **MVVM**, and **Room**.

SkySnake – Android Snake game built with Kotlin and Jetpack Compose; **published on Google Play**.

PUBLICATIONS / OPEN SOURCE

Orbit – Reusable Jetpack Compose UI library with themes and utilities for faster Android development.

Dependency: **com.github.gowthambharathn:Orbit: <version>**

SUMMARY

Android Developer with 2+ years of part-time experience building production-grade apps using Kotlin, Jetpack Compose, MVVM, and Clean Architecture.

SKILLS

- Android:** Kotlin, Jetpack Compose, Android SDK
- Architecture:** MVVM, Clean Architecture, Repository Pattern
- Data:** Room, SQLite
- Networking:** REST APIs, OkHttp
- Security:** Android Keystore, AES-GCM, SQLCipher
- Tools:** Git, GitHub, Android Studio
- AI/ML:** Python, TensorFlow, Keras, TFLite

EDUCATION

RD National College of Arts & Science

Bachelor of Information Technology 2024 – 2027

ACHIEVEMENT

Most Promising Developer Award

— Delivered multiple competitive project ahead of schedule.
